HELPFUL PRINCIPLES

➤ **YOU NEED TO SEE WHAT WORKS**
The only way to know if certain colors work well is to see them in front of you and to use your intuition to judge.
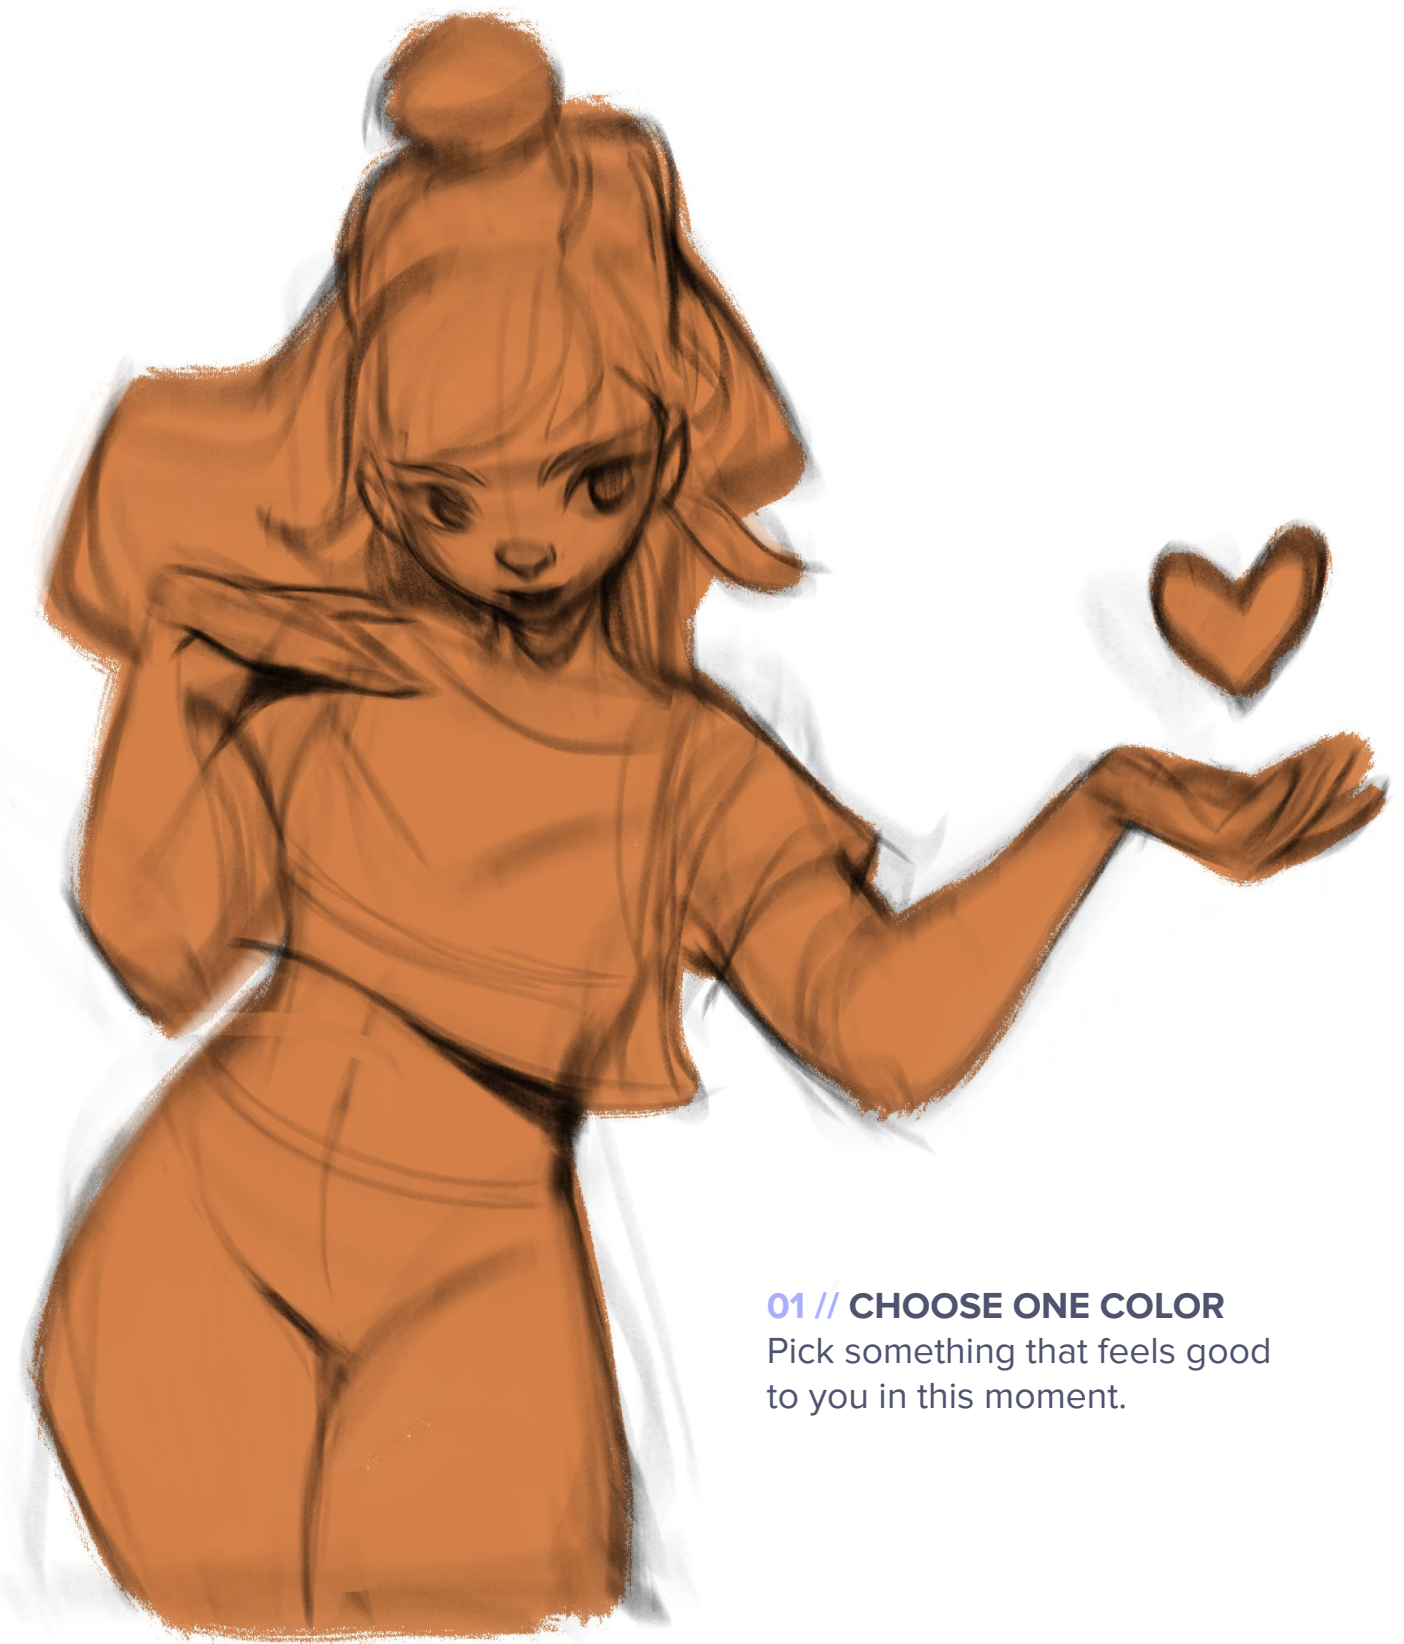

➤ **START WITH ONE COLOR**
If you start with one color and slowly introduce new ones, it will be easier to find a harmonious color scheme.

TIPS

- Use the **color modification tools** to experiment and test out different color combinations.

- Don't worry too much about getting colors right - **have fun and experiment**!

01 // CHOOSE ONE COLOR
Pick something that feels good
to you in this moment.

02 // **ADD NEW COLORS**
Introduce new colors to your
color scheme one-by-one.

03 // **ADD COLOR GRADATIONS**
Using a soft brush or feathered lasso, add some soft color transitions to make the colors look less flat.

04 // **CHANGE THE LINE COLOR**
Set the line layer to multiply and change the color to something that blends more nicely with the base colors.
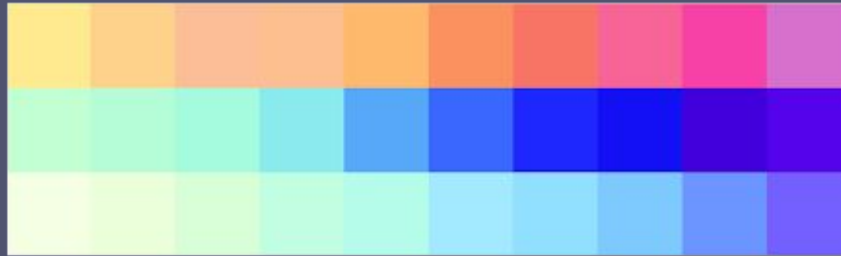

05 // FINALIZE
Add some simple shadows on a multiply layer, and use colors already on the canvas to render out some of the details.
